

Guidelines: For quality and safety

© Africa Studio / Fotolia

Guidelines support doctors in their decisions, to ensure optimal medical care for patients.

The systematic action-on recommendations help to achieve greater quality and safety in medicine.

The DGOU Guidelines Secretary

The [DGOU guidelines secretary](#) organises for regular revision of the guidelines. As such, methodical recommendations based on scientific evidence must be reviewed and adapted. In parallel to this, new guidelines on further clinical topics from the field of orthopaedics and trauma surgery are created.

DGOU is Member of the AWMF

Since 2018 the German Society for Orthopaedics and Trauma (DGOU) is a member of the Association of the Scientific Medical Societies in Germany (AWMF) and could therefore create guidelines in diagnosis and treatment of diseases and injuries in the field of O&U. Most of the guidelines are developed by the parent-associations of the DGOU: the German Society for Orthopaedics and Trauma (DGOOC) and the German Trauma Society (DGU).

[DGOOC Guidelines](#)

Here you can find the current guidelines from the German Society for Orthopaedics and Orthopaedic Surgery (DGOOC), as well as guidelines that are currently under review or have been registered.

[DGU Guidelines](#)

Here you can find a list of current guidelines from the German Trauma Society (DGU) as well as an overview of DGU guidelines that are currently under review.

Seminars on the creation and updating of guidelines

© AWMF

The [Association of the Scientific Medical Societies in Germany](#) [Arbeitsgemeinschaft der Wissenschaftlichen Medizinischen

[Fachgesellschaften\] \(AWMF\)](#) offers introductory seminars for the creation of guidelines, in cooperation with the Web Portal [Clinical Guide Line Services - UserGroup](#). The online platform supports the members responsible for guidelines in both transparent reviewing and development of guidelines, and offers help during literature research.
